Steps:

- Please make a visual inspection of the fixture prior to installation. If any defects are to be found please return to your place of purchase for a replacement.
- Make sure all power is turned off from the mains switch board prior to removing or installing a new fixture.
- Please install the supplied mounting bracket. This will be located on the rear of the product and held into place with grub screws.
- When installing the bracket please use correct screws to suit the surface into which you are mounting to. (The provided screws are general purpose and may not suit the application).
- Once mounted please remove the terminal block cover located on the rear of the luminaire. Proceed in making the electrical connection in accordance with Australian standards.
- After connection has been made please proceed in installing the fixture back into place. Please tighten the grub screws and ensure fitting is securely mounted.
- Please turn on the mains power and check the fixture to make sure all is in working order.
- To ensure the appearance of your new fixture it's advised that you clean the fixture at least every 12mths with fresh clean water and a mild soap.

Note: -The lamp must be installed by professional electrician
-Ensure the power supply is switched off before fitting this product

-Do not touch the lamp when in use
-Keep away from hot steam and corrosive gas
